Summary

Aspiring Data Analyst with hands-on experience in data cleaning, KPI generation, and dashboard development using SQL and Power BI, backed by strong Python-based data analysis, EDA, and machine learning skills from internship and academic projects. Comfortable working across the data lifecycle – from raw data to actionable business insight – with additional exposure to applied AI/ML tooling.

Technical Skills

- **Programming & Query Languages:** Python, SQL
- **Data Analysis & Visualization:** Exploratory Data Analysis (EDA), Data Cleaning, Feature Engineering, KPI Generation, Power BI, Excel
- **Productivity & Collaboration:** Google Workspace (Gmail, Docs, Sheets, Slides), Git, GitHub
- **Databases:** MySQL, MongoDB, SQLite, Firebase, REST APIs
- **Machine Learning & AI:** Supervised Learning, Unsupervised Learning, CNN, LSTM, NLP, Model Evaluation
- **Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Keras, Flask, Streamlit
- **Tools & Cloud:** Google Cloud, VS Code, Jupyter Notebook, Docker, Render

Experience

Data Science & Analytics Intern

Amdox Technologies

April 2026 – Present

Hyderabad, India

- Developed **NeuralRetail**, a retail analytics platform using Python, SQL, and Power BI to analyse 1M+ retail records, building a star-schema data model, DAX measures, and an 11-page KPI dashboard covering sales, customer behaviour, and inventory.
- Performed end-to-end EDA, data cleaning, and customer segmentation (clustering) to translate raw transactional data into business-ready insights and recommendations.

AI/ML Research Intern

IIIT Ranchi

May 2026 – Present

Hybrid

- Conducting research-driven experimentation and cross-domain evaluation on a plant disease detection system, analyzing model performance metrics to guide architecture and accuracy improvements.

AI/ML Intern

CodexIntern

April 2025 – October 2025

Hyderabad, India

- Designed modular Flask-based backend services integrating multiple APIs for automated, data-driven workflows and context-aware application logic.

Machine Learning Engineer (Freelance)

Client Project (Confidential)

May 2024 – December 2024

Hyderabad, India

- Built a data preprocessing, augmentation, and evaluation pipeline over 70K+ labelled images as part of an end-to-end crop disease classification system, achieving over 90% validation accuracy.

Projects

NeuralRetail – AI Sales Analytics

Python, SQL, Power BI, Scikit-learn

- Built an end-to-end retail analytics platform performing sales forecasting, customer segmentation, and inventory analysis on 1M+ records.
- Designed a star-schema Power BI dashboard with DAX measures across 11 pages to support data-driven retail decision-making.

StockMentor

Python, LSTM, Data Visualization

- Built a stock market analytics platform combining real-time data with LSTM-based predictions, achieving 85% prediction accuracy and a 30% lift in user engagement through watchlists and alerts.

CrowdPulse – Crowd Analytics Platform

Python, Computer Vision, Analytics Dashboards

- Built a real-time crowd analytics platform performing density estimation and occupancy monitoring, delivering actionable public-safety analytics for smart-city and transportation use cases.

Education

Jawaharlal Nehru Technological University Hyderabad B.Tech – Computer Science and Engineering (AI & ML Specialization)	2021 – 2025 <i>CGPA: 7.44</i>
Kendriya Vidyalaya Gachibowli Higher Secondary (CBSE)	2019 – 2021 <i>CGPA: 8.2</i>

Certifications & Achievements

- **Google Build with AI Bootcamp (2026)** | Google Cloud Gen AI Exchange Program | Vertex AI Gemini Skill Badges
- **Infosys Springboard** Generative AI Virtual Internship (2025) | Computer Vision with Python (Udemy)
- **NPTEL** Python for Data Science | **1st Place** – **Mind Plug Fiesta National-Level Hackathon**
